

## Social Media Ethics - Group Activity

### Corporate Responsibility vs. Individual Freedom vs. The Middle Path

	Explanation	Scenario 1	Scenario 2	Scenario 3
<b>Corporate Responsibility</b>	Platforms prioritize safety and accountability, even if it limits some freedoms.	Facebook is removing fake COVID-19 cure posts to protect public health	Twitter is banning hate speech accounts to prevent violence	YouTube is disabling comments on kids' videos to stop exploitation
<b>Individual Freedom</b>	Users should be free to express opinions, even if controversial or unpopular.	Citizens criticizing their government on X (Twitter) without censorship	Users posting unpopular climate change views	TikTok creators openly share LGBTQ+ content in conservative societies
<b>The Middle Path</b>	Balance between safety and free speech through transparent rules.	Instagram is using content warnings for sensitive art instead of deleting it	Reddit is deleting violent threats but keeping political debates	TikTok is applying age restrictions on mature content instead of banning it
